ABOUT ME

I am a software developer specializing in iOS mobile application development, holding a Bachelor's degree in Computer Engineering from Bilecik Şeyh Edebali University. I have 6 production-level applications currently live on the App Store. Toyzie, which I contributed to as part of the development team, reached 100K+ downloads and ranked in the Top 30 of the U.S. App Store Reference category. I have hands-on experience with Swift, SwiftUI, UIKit, Combine, and async/await, working with MVVM and MVC architectures, RESTful API integrations, App Store deployment processes through App Store Connect and TestFlight, unit testing, and performance optimization. I also have experience collaborating with cross-functional teams in Agile/Scrum environments.

EXPERIENCE

iOS Developer - Hitmaker

January 2026 - May 2026

- I have played an active, end-to-end role in the development of multiple mobile applications.
- Worked with SwiftUI, Swift, MVVM Architecture, RESTful APIs, Cloudflare Workers, AWS, and Git.
- Contributed to the App Store submission and release process of Toyzie, helping the app reach 100K+ downloads.
- [Toyzie – App Store Link](#) 

Long Term Intern iOS Developer - FMSS Information Technology

February 2025 - July 2025

- Contributed to two different projects built with SwiftUI and UIKit.
- Collaborated within Agile (Scrum) teams, taking part in daily stand-ups, sprint planning, and task tracking processes.
- Gained hands-on experience with widely adopted industry technologies including Swift, SwiftUI, UIKit, RESTful services, Git, and Jira in real-world projects.

DENEYAP Mentor

December 2024 - May 2025

- It was a process in which I mentored T3 Foundation's high school students in their personal development in terms of software and had the opportunity to develop projects together.
- I had the opportunity to learn team management and coordinating communication within the team.

EDUCATION

Bilecik Şeyh Edebali University - Computer Engineering

September 2020 - August 2025

- Thesis Project: Developed a letter prediction application using SwiftUI based on the EMNIST dataset.

PROJECTS

[Toyzie AI](#)

An AI-powered toy recognition app available on the App Store, built with MVVM architecture. Users can scan toy figures—primarily Hot Wheels—using their device camera to access detailed identification results. I actively contributed to the development of the app, which surpassed 100,000+ downloads in the U.S. market and ranked in the Top 30 of the App Store Reference category.

[Duo Shot](#)

An iOS app that allows users to record videos in both 9:16 vertical and 16:9 horizontal formats simultaneously. Architected and developed from the ground up with MVVM. I single-handedly implemented the AVFoundation-based dual-format recording pipeline, camera session management, and file handling workflows end-to-end.

[Docu AI](#)

An AI-powered, all-in-one iOS document toolkit built with MVVM architecture. Key features include document and receipt scanning, digital signing, AI-generated signatures, image enhancement, and seamless conversion across multiple file formats. Designed to be a one-stop solution for all document-related needs in a single app.

SKILLS

- **Technical Skills:** Swift , SwiftUI ,UIKit, Xcode, MVVM, Agile - Scrum , Jira , Bitbucket , Swagger , Alamofire , CoreData, Firebase , Git , RestfulAPI, CI/CD , SPM, AWS, Cloudflare
- **Language :** B1 level English
